Cost price strategy

A strategy can be created with diffeent number of levels where suppliers can be prioritized separately on each, below example have two level with supplier priority and one with on-stock.

1. Supplier priority (lowest value wins)			<i>(priority)</i>	Priority level - Find the supplier(s) with the best priority
ALSO	100			If reseller uses the Nettailer supplier to update stock/prices (manually or automatically), prioritet can beused to either overrule other suppliers (lowest value) or be taken last (highest value).
Despec	100			
Ingram Micro	100			
Tech Data	100			
Westcon	100			
Brightstar	200			
EET	300			
Exertis	300			
Nettailer (reseller own)	999			
2. Product in stock at supplier				
ALSO	Yes			
Despec	Yes			
Ingram Micro	Yes			
Tech Data	Yes			
Westcon	No			
3. Supplier priority (lowest value wins)			<i>(priority)</i>	Priority level - Find the supplier(s) with the best priority
ALSO	10			If desired, additional levels with additional priority can be added to the strategy
Ingram Micro	10			
Tech Data	20			
Despec	30			
4. Lowest price				Find the remaining supplier with the lowest price
Ingram Micro	99,00			Cost price in shop is based on this
ALSO	100,00
